

Drum stands

These drum stands are the versatile answer to storing, tilting and handling standard size drums. The complete integrated range starts with a simple stand designed to keep the drum horizontal when stored, and lets you tilt for pouring.

static or mobile

Further options include outrigger and castor wheels to make the unit mobile. These can then be specified with drum rotation rollers.

A handy tilt lever is another option, to make handling and transportation that much easier. Finally we have included a 'hook on' drip tray to keep the surrounding floor area clean and hazard free.

Complete with:

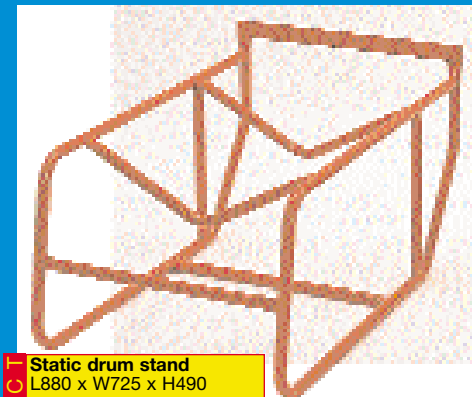

- 2 x Fixed wheels
- 2 x Pair castors
- 1 x Set drum rollers
- 1 x Tilt handle

Designed for the heaviest uses in industry both inside and outdoors, these rugged trucks are available in four options depending on their use. Choose either two or four wheel designs - both are strong however the extra rear swivel castors will give extra stability and manoeuvrability when fully loaded. The extra long handle creates good leverage with heavy drums.

- **Strong tubular construction ...**
- **Solid or pneumatic tyres ...**
- **Centre beam incorporates an adjustable drum retaining hook**
- **Rear support castor option ...**

All models include a sliding centre section with a hook to firmly grasp the drum lip. Finished in red air dry enamel, fitted with red plastic hand grips as standard.

Practical robust storage for drums - both inside and out ...

A strong and flexible system to store your drums. Designed to fit 200/220 litre steel drums in pallets that can be easily stacked with fork trucks.

Each pallet will hold two or three drums and can be stacked up to three high.

Together with this we have added a full range of essential accessories to turn these pallets into a complete system. Choose from:

- A steel liquid tight sump unit that can also be handled by a fork truck for efficient and lean waste disposal.

Capacity 250 litres - formed from 3mm sheet steel with fully welded seams. Ground clearance 100mm

- Drum rotation sets that can be added at any time to the pallet.

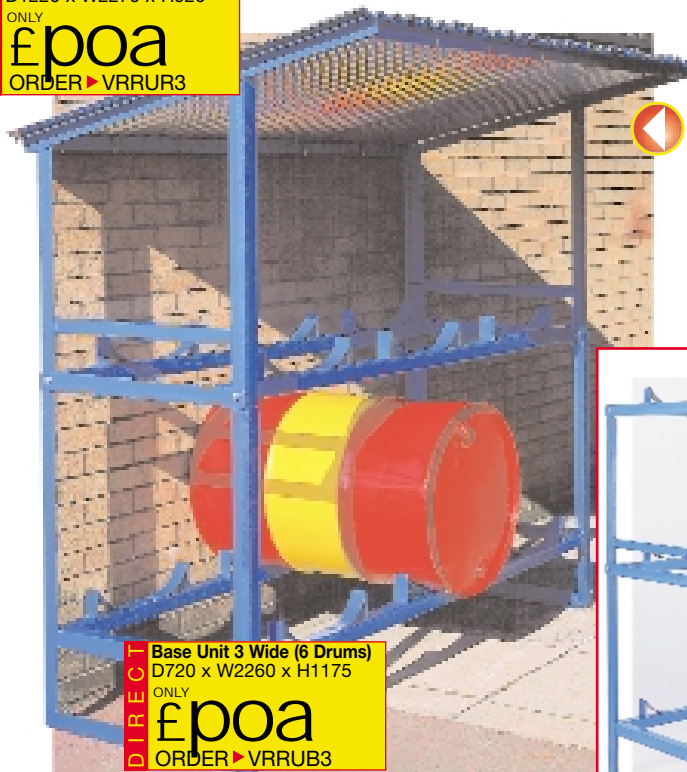

Drum rotating sets: fitted with 4 x 65mm dia. nylon rollers. The zinc plated unit simply drops securely onto pallet beams.

- Leak dispenser unit that can be placed onto the pallet directly underneath the drum to catch spillages.
