Storage Equipment

Wire Mesh lockers

These bright zinc plated mesh lockers are manufactured from 25 x 25 x 2.5mm wire welded mesh on a 6-8mm diameter framework, complete with legs to give a 150mm floor clearance. Fixing positions located on sides and legs for increased stability. Hasp and Staple door lock to suit padlock (not supplied). Additional security is offered with three point locking on all single and two tier compartment configurations only. Internal fixings: hat shelf and coat hook as standard in all single compartment. Two tier compartments fitted with coat hook only.

- **High visual security**
- **Increased ventilation**
- **Three point locking on single and two tier lockers**
- **Suitable for on site purpose built drying rooms**

Colour locker range

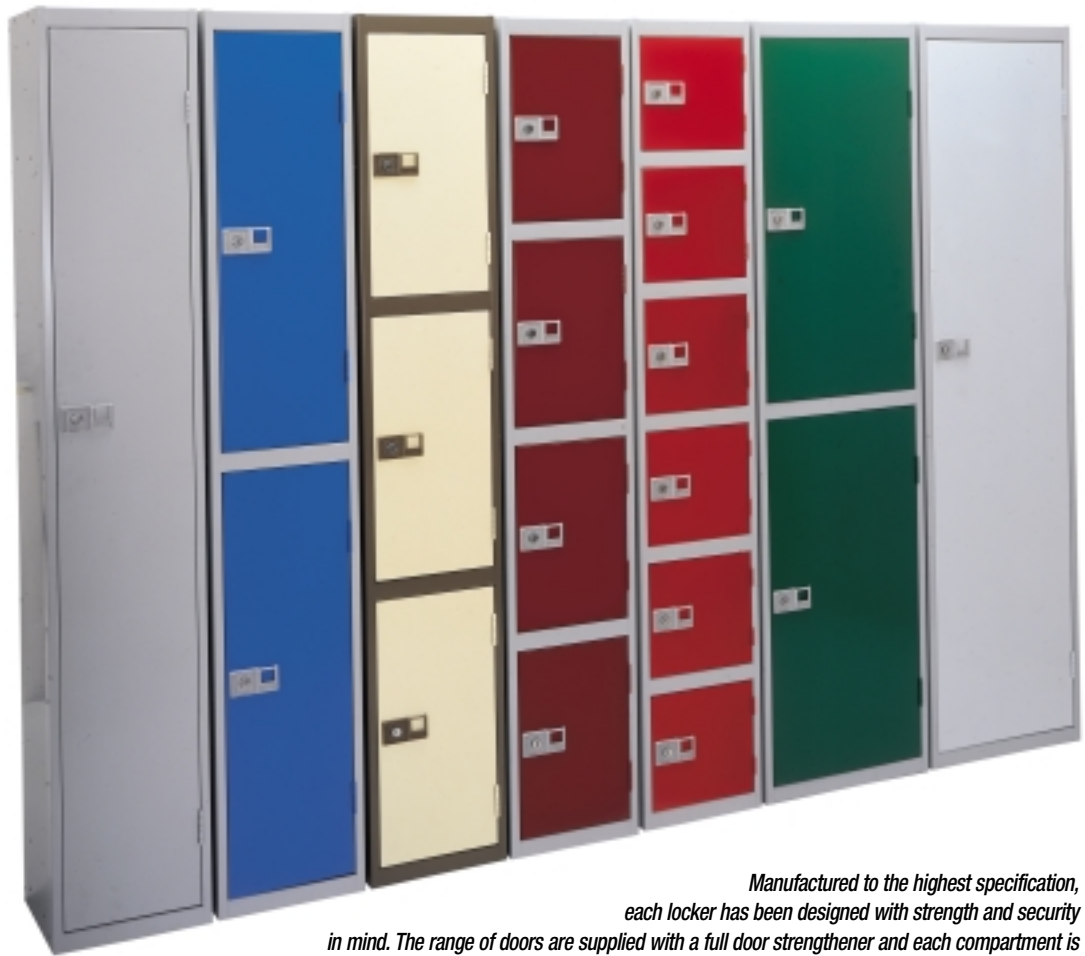

A truly impressive specification is included as standard with all lockers ordered from Storage Direct.

Extra colour options AT NO EXTRA COST: Two tone Grey, single tone Grey, Grey carcass - Red, Blue, Green and Maroon doors. Brown carcass - Cream doors available.

The **best** specification plus the **best** value for money ...

Manufactured to the highest standards for industrial strength ...

All initial lockers are direct from stock - However nested lockers offer cost savings and are quicker and easier to install, thus eliminating time, money and effort spent on installation. All lockers are manufactured with nesting holes to all sides.

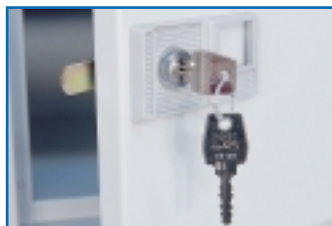

Manufactured to the highest specification, each locker has been designed with strength and security in mind. The range of doors are supplied with a full door strengthener and each compartment is separated using a plinth to improve inter-compartment security. To eliminate installation damage each locker has a reinforced base also providing strength and rigidity. All lockers are powder coated to the latest specifications and all single lockers come complete with inner shelf and double coat hook. Two tier lockers are supplied with coat hook only. A choice of seven colour combinations at no extra cost - please specify colour at time of order.

Factory fitted sloping tops available on most lockers. Ideal choice for clean room environments. refer to page 120

Each compartment is separated by a plinth to improve intercompartment security.

Robust double entry Key Camlock - fully mastered. Option of Padlock type fitting at - no extra cost.

Two Person Lockers
Each user has a vertical compartment for hanging garments and a top compartment for smaller items. If room is limited then this space saving unit can accommodate more users in a given area than standard lockers.

Clean and Dirty Lockers
These are used for keeping work overalls separate from normal clothes. The locker has an internal partition with coat hooks in each segment. This together with the handy shelf set at 305mm from the top of the locker makes this a most popular design.

Twin Lockers
Where space is at a premium you may consider these lockers particularly useful as nearly double the amount of users can be accommodated in the same space as a traditional design.

Combi Lockers
Similar in specification to the clean and dirty locker offering extra space for both personal and tool storage. With full length compartment and hanging rail.
