

You'll be surprised just what goes into a LINPAC WHEELIE

They're really tough!

And when you think about it, they need to be! Kept outside in all weathers, they have to resist frost, heat, chemicals and ultraviolet rays - so the body, handles and lids are made from a specially developed polyethylene with a high modular weight.

So that they last the rigours of everyday use, they include solid rubber tyred 200mm diameter wheels retained with a spring loaded bolt and an axle of solid hardened, galvanised steel.

That is why hundreds of local councils have adopted Wheelies as their method of refuse collection. They are compatible with all established Comblift bin hoist mechanisms, easily manoeuvrable, lightweight and yet the construction is still strong and very robust.

And you thought they were just dustbins! ...

- **Creating a faster and more efficient refuse collection service ...**
- **Helping to keep our streets cleaner healthier and tidier ...**
- **Increasing safety and hygiene for both collectors and customers ...**
- **Allowing better re-cycling facilities to help our environment ...**

Salt-Grit Bins

There are two handy sizes available in this range.

DIRECT Capacity-330 Litres
H530(Front) x 760(Rear) x L1270
ONLY
£poa
ORDER▶VWHGB12

As with the safety products above, these bins are designed to the highest standards for inside or outdoor use. They are all manufactured from impact resistant UV light stabilised polyethylene to withstand climatic extremes.

Secure close fitting bins complete with a double wall construction makes these resistant to vandals. Non corrosive large capacity base with drainage holes which will nest for easy storage when not in use. Large full width opening lid which hinges to 270° - means that the sand/grit can be accessed easily. The base of the units are recessed so that they can be lifted mechanically.

DIRECT Capacity-170 Litres
H450(Front) x 650(Rear) x L1040

Galvanised liners that lock into place

Wall or post mounted

The problem nowadays with waste bins is that they are often a target for vandals, they can be stolen or even set on fire. This 'sign of our times' mean that we need to design special features into our litter bins to help deter this element.

These wall mounted bins have a locking feature so that they don't disappear. When they are joined to walls they include concealed fixings.

The material is UV stabilised polyethylene supplied in bright colours - attractive so they can be used inside, yet designed to be strong and rugged enough for outdoor use too!
